

ContentWatch Wins Award for Best Internet Filtering and Spam Products

Friday, May 13, 2005

Company acknowledged as leading Internet and spam filter provider for homes.

SALT LAKE CITY – May 12, 2005 – ContentWatch Inc., has been selected as the Gold Award Winner in both the Spam and Internet Filter categories by the TopTenREVIEWS.com website. Based out of Salt Lake City, ContentWatch is a trusted provider of Internet filter and protection tools designed for families and small-to-medium businesses.

“ContentProtect is an excellent product, coming out on top as the overall best family Internet filtering software in the marketplace. ContentProtect is a powerful filtering tool that allows you to determine what Internet content enters your home,” according to TopTenREVIEWS “EmailProtect is an outstanding tool that lets you integrate your email filter preferences easily. EmailProtect comes with predefined categories that intelligently label spam several ways; settings let you filter incoming email by category, email address, server, domain, and even by specific key words.”

ContentWatch’s ContentProtect is one of the most effective and flexible Internet filters available for the home, libraries, schools, government entities and is particularly well suited for small-to-medium size businesses. It provides the ability to easily customize filter settings to fit the needs of each family member or employee. It is also the only family-oriented application that makes it easy to manage home or business Internet use from a remote location. The EmailProtect option offers filtering and control software for email. EmailProtect gives users control over who may send them email by preventing unwanted email from ever entering their Inbox.

“We are very happy to have been selected as the winner in both the Spam and Internet Filter categories over other strong companies, such as Mcafee, Norton, CYBERSitter, and Net Nanny,” said Jack Sunderlage, President & CEO of ContentWatch. “The awards help validate ContentWatch’s role as the leading provider of Internet filters and protection tools for the home and small business market.”
